

THE INTELLIGENT VIRTUAL GUARD SERVICE BENEFITS:

Real-Time-Interaction – 24/365 real-time intelligent remote guarding and response, including live and recorded audio response and talk-down, real-time interactive input and output deterrents.

Accountability – Using state of the art technology, video, intrusion alerts and other critical alerts are recorded, stored and are available for review and forensic investigation. Authorized personnel can have real-time visibility of the remote site at any time, day or night. A report would be sent to the client within 24hrs of an incident, inclusive of video evidence of the incident.

Dependability – Our Intelligent Virtual Guard is not affected by physical nor emotional fatigue and human error and will perform its security duties 24/365 attentively without the need for bathroom, lunch, dinner or rest breaks. All systems have an internal battery backup and multiple communication links to ensure continued operation for short durations of power outages.

Consistency – Our Intelligent Virtual Guard provides the same level of on-site professional quality security services every minute without distractions and is not affected by personnel rotation, shifts, and human error.

Resiliency – Our Intelligent Virtual Guard is not affected by weather, illness, nor emotional and physical threats and will continue to perform in harsh conditions and environments.

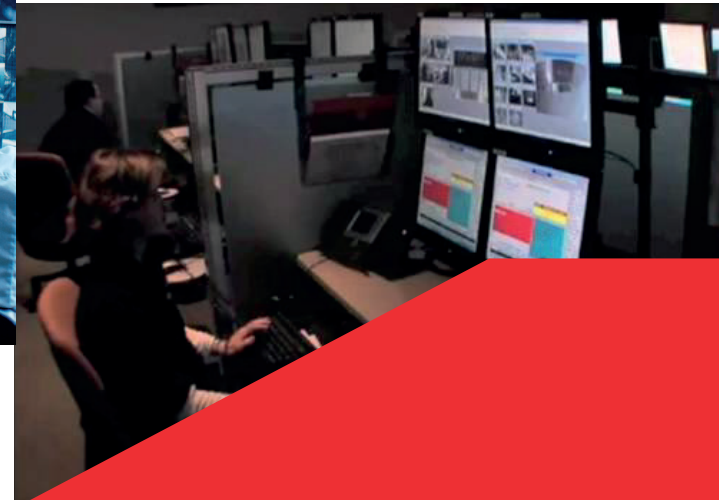

Cost savings – While providing more capabilities, the Intelligent Virtual Guard cost is significantly less than hiring manned guards and can possibly reduce monthly security cost between 30% to 40%.

THE INTELLIGENT VIRTUAL GUARD (IVG) SERVICES:

The Intelligent Virtual Guard (IVG) service is an advanced technological solution, providing remote guarding security services to secure one or more sites. Our IVG service is customizable to meet the individual needs of the customer, allowing for 24/365 real-time interactive and intelligent remote guarding and response by specially trained intervention operators at a fraction of the traditional manned security guard cost.

**ENHANCE CRITICAL
INFRASTRUCTURE SECURITY
AND RESILIENCY
WITH
INTELLIGENT VIRTUAL GUARD
SECURITY SERVICES**

are always watching over and protecting your
assets 24/365**

INTELLIGENT VIRTUAL GUARDS

- ◉ Force Multiplier; Multiple CCTV Eyes
- ◉ Monitors critical sites in any weather condition
- ◉ No bathroom or lunch breaks needed
- ◉ Records Video and Alerts
- ◉ Always Attentive, Supervised and Accountable
- ◉ Increased Security; can cover the whole compound
- ◉ Central Monitoring with Armed Response

MANNED GUARDS

- ◉ Only two eyes per guard, may need multiple guards
- ◉ Manned guards may need to abandon sites/locations
- ◉ Need bathroom and lunch breaks
- ◉ No recording of incidents; relies on human memory
- ◉ Loss of attention = human error
- ◉ May need multiple Guards
- ◉ Supervisor needs to schedule site/location visits

ENHANCED FEATURES

The IVG solution can be enhanced by linking to other security systems such as:-

- ◉ Perimeter protection, PIDS
- ◉ Intrusion, fire, smoke alarm system
- ◉ Flood detector
- ◉ Access and Gate control
- ◉ Panic buttons
- ◉ Security fogging machine,
- ◉ Strobe lights,
- ◉ Advanced Analytics
(e.g. Facial and License Plate recognition) etc.

Our Intelligent Virtual Guard provides a more comprehensive security solution than your Basic Manned Security Guards.

THE INTELLIGENT VIRTUAL GUARD EXPERIENCE:

- » **Remote Locations**– Ideally suited to provide 24/365 days guarding services for remote locations even when it may be dangerous to have human guards.
- » **Total Facility Coverage** - The IVG is not vulnerable to job fatigue, washroom and lunch breaks and there will be no cases of sleeping on the job or officers doing back-to-back 8/12-hour shifts.
- » **Advanced sight**- The IVG can see further and better at night, giving those monitoring a better view of your site.
- » **Remote Monitoring and Communication** - On an alert, live video feed from multiple eyes (cameras) are transmitted in real time to IVG Incident Command Centre and our trained intervention operators will confirm, challenge or “talk down” intruders to prevent damage and loss. Our IVG service also includes Armed Response.

- » **Guard the Guard** - Strengthen your existing manned security guard services with the IVG solution; you can now “guard the guard” cost-effectively and add resiliency to your existing manned guard services.
- » **Evidence** - With 24/365 remote monitoring and recording from multiple eyes (cameras), when an incident occurs you will have recorded video of the incident which you could provide to law enforcement instead of relying on the security guard’s memory of the event.

IDEALLY SUITED FOR:

- ◉ Banks and Remote ATM locations
- ◉ Energy Industry/Remote Well Sites
- ◉ Utility Companies (Electricity and Water)
- ◉ Construction/Industrial sites
- ◉ Cellular Tower/Remote sites
- ◉ Warehouse Security, Schools & Campuses
- ◉ Commercial Buildings, Gated Communities
- ◉ Real-Time Mobile Surveillance
